

Cleaned Wire

Our Strength

ELF Filaments offers cleaned wires in both Tungsten & Molybdenum.

We have modern electropolishing and cleaning machines for treatment of all sizes of tungsten and molybdenum wires. Cleaning ensures no visible evidence of drawing lubricant residues, oxides or any other foreign matter such as dirt, oil etc.

We can offer variable finish for tungsten and molybdenum wires ranging from mat-grey to bright shining. This difference however is not related to cleanliness.

We also offer clean, annealed and straightened (CAST) wires.

Installed Capacity

Wire below 0.2 mm - 100 Kg. Per month

Wire above 0.2 mm to 2 mm - 1.8 Tons per month

Specifications :

Wire Diameter : 0.015 to 2.5 mm

Material : Tungsten / Molybdenum
